

## Thank you for continued prayer

**For the next four weeks I am wearing the cadillac of heart monitors.**

Pray they finally find the cause of my symptoms, lack of endurance and rapid sort of weak heartbeat. *I do fair in mornings but by two or three in afternoon am pretty worn out/exhausted. Doctor says it is not heart failure or congestive heart disease, probably something to do with electrical signal but they want more information. For me information would be good, but God's healing even better.*

**Pray for grace to finish recoding our biggest website so it is mobile friendly.** The site has MANY coloring pages, bulletin inserts etc, and will take at least a month of reasonable health to recode everything.

**If anyone** has a little free time we would appreciate your reaction to the new site!! It can be seen at [www.bibleparent.faith](http://www.bibleparent.faith). Our email is [partner@bibleparent.com](mailto:partner@bibleparent.com) or just reply to the weekly newsletter.
