

Hope you might continue to pray for my brother Phillip?

His memory problems are worsening. Our biggest problem at the moment is that he is trying to help other residents in wheel chairs. The lady he ate with liked him to push her back to her room but she is now gone and he is wanting to help other people who unfortunately do not want to be helped. We have someone to eat with him for a month or so to make sure he does not try and push other residents but would surely appreciate your prayers.

Continuing Prayer for our project with The National Day of Prayer Task Force. They have assigned a special committee to review our website, coloring books and prayer cup project. This committee will report back to the National meeting the tenth of December.
